

# 100 Core C# Coding Questions

| #  | Question                                       |
|----|------------------------------------------------|
| 1  | Reverse a string                               |
| 2  | Check palindrome string                        |
| 3  | Count vowels and consonants                    |
| 4  | Count frequency of characters                  |
| 5  | Remove duplicate characters from string        |
| 6  | Find first non-repeating character             |
| 7  | Find duplicate characters                      |
| 8  | Check anagram                                  |
| 9  | Reverse words in sentence                      |
| 10 | Count words in string                          |
| 11 | Find longest word                              |
| 12 | Remove spaces                                  |
| 13 | Replace character manually                     |
| 14 | Convert to uppercase manually                  |
| 15 | Convert to lowercase manually                  |
| 16 | Count substring occurrences                    |
| 17 | Check string contains only digits              |
| 18 | Extract digits from string                     |
| 19 | Check string rotation                          |
| 20 | Longest substring without repeating characters |
| 21 | String compression                             |
| 22 | Balanced parentheses                           |
| 23 | Remove special characters                      |
| 24 | Get ASCII values                               |
| 25 | Char array to string                           |
| 26 | Find largest element in array                  |
| 27 | Find smallest element                          |
| 28 | Find second largest                            |
| 29 | Reverse array                                  |
| 30 | Bubble sort                                    |
| 31 | Selection sort                                 |

|    |                                     |
|----|-------------------------------------|
| 32 | Insertion sort                      |
| 33 | Remove duplicates from array        |
| 34 | Find missing number                 |
| 35 | Find duplicates in array            |
| 36 | Count frequency of array elements   |
| 37 | Merge two arrays                    |
| 38 | Find intersection                   |
| 39 | Find union                          |
| 40 | Rotate array                        |
| 41 | Move zeros to end                   |
| 42 | Subarray with given sum             |
| 43 | Maximum subarray sum                |
| 44 | Pair with given sum                 |
| 45 | All pairs with given sum            |
| 46 | Equilibrium index                   |
| 47 | Majority element                    |
| 48 | Peak element                        |
| 49 | Rearrange positive and negative     |
| 50 | Minimum difference between elements |
| 51 | Fibonacci series                    |
| 52 | Factorial using loop                |
| 53 | Factorial using recursion           |
| 54 | Check prime                         |
| 55 | Print primes in range               |
| 56 | Sum of digits                       |
| 57 | Reverse number                      |
| 58 | Armstrong number                    |
| 59 | Palindrome number                   |
| 60 | Swap numbers                        |
| 61 | Multiplication table                |
| 62 | Count digits                        |
| 63 | GCD                                 |
| 64 | LCM                                 |
| 65 | Power of number                     |
| 66 | Iterate dictionary                  |

|     |                                    |
|-----|------------------------------------|
| 67  | Find duplicates using HashSet      |
| 68  | Sort list                          |
| 69  | Group elements using dictionary    |
| 70  | Count frequency using dictionary   |
| 71  | List to dictionary                 |
| 72  | Find max/min in list               |
| 73  | Remove duplicates from list        |
| 74  | Common elements in lists           |
| 75  | Queue using list                   |
| 76  | Stack using list                   |
| 77  | Priority queue concept             |
| 78  | LINQ filtering                     |
| 79  | LINQ grouping                      |
| 80  | LINQ sorting                       |
| 81  | Filter even numbers using LINQ     |
| 82  | Top N records                      |
| 83  | Group by property                  |
| 84  | Join collections                   |
| 85  | Order by multiple fields           |
| 86  | Select specific fields             |
| 87  | Distinct values                    |
| 88  | FirstOrDefault vs SingleOrDefault  |
| 89  | Any vs All                         |
| 90  | Count with condition               |
| 91  | Deep copy object                   |
| 92  | Shallow copy object                |
| 93  | Singleton pattern                  |
| 94  | Thread-safe singleton              |
| 95  | Async method                       |
| 96  | File read/write                    |
| 97  | JSON serialization/deserialization |
| 98  | Retry logic                        |
| 99  | Logging class                      |
| 100 | Simple caching using dictionary    |
