

Angular Interview Questions (Basic to Pro)

Basic Angular Interview Questions

1. What is Angular and why do we use it over plain JavaScript or jQuery?
2. Difference between AngularJS and Angular (Angular 2+)?
3. What are components in Angular?
4. What are modules in Angular? Why do we use NgModule?
5. What is the difference between declarations, imports, providers, and bootstrap in @NgModule?
6. Explain data binding in Angular. What are the different types?
7. What are directives in Angular? Types of directives?
8. What is the difference between ngIf, ngFor, and ngSwitch?
9. What are Angular services and why do we use Dependency Injection (DI)?
10. What is a pipe? Difference between built-in and custom pipes?

Intermediate Angular Interview Questions

11. What are lifecycle hooks in Angular? Explain ngOnInit, ngOnChanges, ngDoCheck, ngAfterViewInit, and ngOnDestroy.
12. Difference between Template-driven forms and Reactive forms.
13. How do you perform form validation in Angular?
14. What are Observables in Angular? Difference between Observables and Promises.
15. Explain RxJS operators you have used in your projects (map, switchMap, mergeMap, concatMap, filter, catchError, etc.).
16. What are Angular interceptors? How do you use them?
17. How do you handle errors in Angular (HTTP errors, global error handling)?
18. What is the difference between ViewChild and ContentChild?
19. What are Angular guards? Types of guards (CanActivate, CanDeactivate, Resolve, etc.).
20. How do you share data between components (parent → child, child → parent, sibling communication)?

Advanced Angular Interview Questions

21. What is Change Detection in Angular? How does it work?
22. What is the difference between Default Change Detection Strategy and OnPush?
23. Explain Zone.js in Angular.
24. How does Angular handle Ahead-of-Time (AOT) vs Just-in-Time (JIT) compilation?
25. What is the difference between Reactive programming and Imperative programming in Angular?

26. What are Subjects, BehaviorSubject, ReplaySubject, and AsyncSubject in RxJS? When do you use each?
27. What is NgRx? Why is it used? Can you explain the flow (actions → reducers → selectors → effects)?
28. How do you optimize Angular applications for performance (lazy loading, preloading strategy, change detection optimization, trackBy in ngFor, etc.)?
29. How do you implement state management without NgRx (using services, RxJS)?
30. How do you secure an Angular application (XSS, CSRF, JWT handling, route guards)?

Expert / Pro-Level Angular Questions

31. How would you design a large-scale Angular application architecture?
32. What is the role of Standalone Components in Angular (introduced in Angular 14+)?
33. Explain Signals in Angular (introduced in Angular 16+).
34. How do you handle server-side rendering in Angular (Angular Universal)?
35. How do you integrate Angular with Micro Frontends?
36. What is differential loading in Angular?
37. How do you debug Angular applications in production (source maps, error logging, Sentry, etc.)?
38. How do you configure and optimize Angular builds using Webpack / Angular CLI configurations?
39. What is the difference between a Monolith Angular app vs Micro-frontend Angular app?
40. How do you implement custom structural directives?
